Living From Your Heart

We are delighted to welcome Harun Rabbani, an award-winning international trainer, mentor and broadcaster

Harun's personal healing journey in 2013 transformed his life beyond recognition. As a result, he developed the Sufi-based Total Heart Transformation energy healing process that many hundreds of clients have used to re-engineer their lives.

You were born to live a life of brilliance, abundance and fulfilment.

Is that what you are experiencing?

If the answer is "no", then it's okay. That is exactly what's happening for most people. It's not your fault. The question is: would you like to change your reality?

Whether you're suffering from health problems, toxic relationships, addictive behaviours, loneliness, career stagnation, financial meltdown, lack of confidence or more, you can change your reality in less than 90 days.

Whether you wish to enjoy better health, become financially abundant, supercharge your career, find your soul mate or fast-track your personal evolution, then make sure you join us.

■ MONDAY 13th NOVEMBER 2017

The Mysterious Bodies Of Peru

Expect nothing but astounding revelations from the Master of the Paranormal, Steve Mera

Throughout the years, there have been many claims of profound discoveries.

The most recent is the mysterious bodies in Peru: bodies with only three fingers and three toes.

However, can we believe what we are told, what we read or find on the internet?

The only way to know is to travel thousands of miles, talk with those involved, conduct examinations and test for DNA.

■ MONDAY 20th NOVEMBER 2017

The Great Pyramid, Sacred Geometry And The Word Of God – A New Model Of Earth.

As regards the universe, forget everything you've been taught at school, college or university: as Darren Nesbit will prove, it's all lies

The most important building in history gives us clues as to the geometry of the earth we inhabit, which by common sense, and repeated observation is neither a ball nor is it in motion.

Darren presents a new model of the fixed-plane earth, showing why it cannot be a circle, with plenty of new graphics and animations modelling the true shape of our home.

And he may well play a song or two afterwards as well!

■ MONDAY 27th NOVEMBER 2017

H2O=Life

Joanne Hafford introduces us to a most fascinating subject, and one that is very close to home, as we are 50-75% water and our molecules 99%

This talk will encompass many water-related areas, such as our precious planet, which is roughly estimated to be 75% water of a combined liquid and ice form

Where did water originate and how did it reach the Earth?

We share our Earth home with magnificent creatures, like jellyfish, which are 98% water, with no brain, respiratory or nervous system.

Before his passing in 2014, Dr Masaru Emoto performed experiments by freezing water from various sources that had been subjected to genres of music; negative and positive intent through words, pictures and prayers; and we will discuss his observations and theories of the outcome.

From what some may see as a simple molecule, the topic is by no means straightforward. For example, how does the Jesus Christ Lizard of Central and Southern America run across the surface of the water?

There remains much unknown regarding this beautiful substance, and experiments show that water is not always H2O!
