#### Alternate Realities – Many Worlds

**Yogi, Ma Sanjnashakti (aka Ann Love) will be presenting an insight into other dimensions of reality**

I live on an island where monks pray most of the day. People from all over the world visit the old church, light a candle and write a prayer request.

One day a child asked if his father could be kinder to him and could we send healing to the multi-universe.

It was a surprise, as science had hardly confirmed the Multi-Universe Theory and he was just a child. How did he know?

Was it instinctive knowledge, perhaps from another life?

Was he a reincarnation of Hugh Everett who first proposed it as an explanation as to why quantum matter behaves erratically?

Or had he been taught this in his Indian education as part of the ancient Hindu teachings?

I wonder where we really go to when we dream. Is it really another reality that exists at the same time as this reality?

When my mother with dementia has three different reality personalities in her mind, each one convincing it's the truth, is she living in three different alternate worlds at the same time?

When in hypnosis, are people recalling past life events in this life or other dimensions?

Can we visit these worlds in meditative states and be aware we are there?

I'm a Yogi and have an interest in free thinking. If you do too, come along to my talk on Alternate Realities and Many Worlds.
